

**All-in-1 Swimming Pool  
Chlorinating Tabs for  
Routine Use in Automatic  
Chemical Feeders or Floaters.**

**POOL  
MATE**

Net Wt.  
**25** lbs.

**ALL-IN-1 SWIMMING POOL  
3" CHLORINATING TABS**

**• Slow-Dissolving Stabilized Sanitizer • Algae Preventative  
• Metal Stain Preventative • Corrosion and Scale Preventative**

**Active Ingredient:**

TRICHLORO-S-TRIAZINETRIONE\* ..... 94.05%  
OTHER INGREDIENTS ..... 5.95%  
TOTAL INGREDIENTS ..... 100.00%  
AVAILABLE CHLORINE ..... 84.65%

\*Trichloroisocyanuric Acid Dry

**Built-In  
Clarifier**

**Built-In  
Sunlight  
Protector**

**KEEP OUT OF REACH  
OF CHILDREN  
DANGER**

See back panel for First Aid and additional precautionary statements.

**ITEM NO. 1-1425M PM**

**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS: DANGER:** Corrosive: Causes irreversible eye damage and skin burns. Harmful if swallowed or absorbed through skin. May be fatal if inhaled. Do not breathe dust or fumes. Irritating to nose and throat. Do not get in eyes, on skin or on clothing. Wear goggles or face shield. Wear coveralls worn over long-sleeved shirt and pants, socks, chemical resistant gloves and chemical resistant footwear. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using restroom. Remove and wash contaminated clothing before reuse.

**POOL SANITIZATION WITH 3 INCH TABLETS**

For use in feeders or floaters - kills bacteria and controls algae, clarifies, prevents metal staining and corrosion, and reduces scale formation.

**IMPORTANT NOTES:**

- Shock your pool every week and also after heavy rain or heavy use to help keep your pool water properly maintained.
- Sunlight, rainfall, temperature, number of swimmers and frequency of pool use affect the rate of chlorine residual loss. Adjust cleaning and chemical maintenance accordingly.
- Use this product in an automatic feeder or floater designed for this product. Follow manufacturer's directions for use.
- Do not add other chemicals into the feeder or floater where this product is in use as a fire or explosion may occur.
- To avoid damage to pool surface or materials do not allow product to come in direct contact with these materials. Do not throw tablets directly into pool.

**DIRECTIONS FOR USE:** It is a violation of Federal Law to use this product in any manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

**BEFORE YOU BEGIN:**

- Ensure all pool equipment is working properly. Adjust stabilizer levels to 40-100 ppm with stabilizer. Follow manufacturer's directions for use.
- Test the water's pH, alkalinity, and calcium hardness and adjust to the correct level. Adjust pH to 7.4-7.6. Be sure to follow label directions when using other products as outlined in directions for this product.
- Check the free available chlorine level and adjust to 2-4 ppm by adding a granular chlorinating product. Follow manufacturer's directions for use.

**START-UP/INITIAL TREATMENT:**

- If water is cloudy or green, superchlorinate pool with appropriate shock product until pool is clear.
- Add 16 ounces of this product (two tablets) per 10,000 gallons of pool water to feeder or floater and then test for the free available chlorine level (allow water to circulate at least 4 hours before testing). Adjust the feeder or floater following manufacturer's instructions to establish a free available chlorine level between 2-4 ppm.
- When free available chlorine level is adjusted to 2-4 ppm, add an algacide appropriate to your needs. Follow manufacturer's directions for use.

**ROUTINE MAINTENANCE:**

Add 16 ounces of this product per 10,000 gallons of pool water per week, or as often as needed, to the feeder or floater to maintain a constant free available chlorine level of 2-4 ppm. Sunlight, rainfall, temperature, number of swimmers and frequency of pool use affect the rate of chlorine residual loss so check the feeder or floater often and refill as needed.

Re-entry into treated swimming pools is prohibited when free available chlorine levels are above 3 ppm due to risk of bodily injury.

**STORAGE AND DISPOSAL:**

Keep this product dry in original tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. Moisture may decompose this product and cause a violent reaction leading to fire and explosion. In case of decomposition, isolate container if possible and flood area with large amounts of water to dissolve all material before discarding this container. Do not contaminate food or feed by storage or disposal.

**CONTAINER DISPOSAL:** Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Clean container promptly after emptying. Rinse thoroughly before recycling or placing in trash.

FIRST AID	
<b>IF IN EYES:</b>	Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
<b>IF ON SKIN OR CLOTHING:</b>	Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
<b>IF SWALLOWED:</b>	Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to by a poison control center or a doctor. Do not give anything by mouth to an unconscious person.
<b>IF INHALED:</b>	Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.
<b>HOTLINE NUMBER:</b> Have the product container or label with you when calling a poison control center (1-800-222-1222) or doctor, or going for treatment.	
<b>NOTE TO PHYSICIAN:</b> Probable mucosal damage may contraindicate the use of gastric lavage.	

**PHYSICAL OR CHEMICAL HAZARDS: CONTAINS A STRONG OXIDIZING AGENT.** Do not mix with other chemicals. Mix only with water. Never add water to product. Always add product to large quantities of water. When using automatic feeding devices, always follow manufacturer's directions as to the proper addition of sanitizer product to chlorinators. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals will start a chemical reaction and generate heat, hazardous gas, possible fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well-ventilated area. Flood area with large volumes of water.

**ENVIRONMENTAL HAZARDS:** This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

NOTE: Buyer assumes all responsibility for safety and use not in accordance with directions.
