

Pool Mate

Enzyme Clear

For Pools & Spas

Prevents Scum Line Build-up & Reduces Water Haze

- *Continuously cleans the filter media and lengthens filter runs*
- *Compatible with all chemicals and sanitizers*
- *Enhances the performance of salt systems*
- *Recommended for weekly maintenance*
- *Helps clear cloudy water*

**KEEP OUT OF REACH OF CHILDREN
WARNING**

See first aid and additional precautions on back panel.

1-2450 L1117PH

1 qt

Enzyme Clear is a unique stabilized enzyme system that catalyzes the bio-oxidation of body oils, suntan lotions and other organic contaminants. When used at the recommended dosage levels on a regular basis, **Enzyme Clear** provides multiple user benefits.

Through the bio-oxidation process, **Enzyme Clear** breaks down the primary components of the scum ring that forms around the water line of most swimming pools. Now, instead of having to spend hours brushing this unsightly scum ring, you can easily prevent it from forming!

The same components that create the scum ring have a chemical oxidizer demand and can cause cloudy water, clog filters and shorten filter runs. By using **Enzyme Clear**, these problems are reduced through the bio-oxidation process so you can continue to enjoy your spa or pool. You will also reduce your chlorine consumption when you break down contaminants with enzymes.

Dosage

Initially add six (6) ounces per 5,000 gallons of pool water and thereafter four (4) ounces per 1,500 gallons per week. If the pool already has a scum ring, you may apply a concentrated dosage to the ring as a scrub. **Enzyme Clear** can be used 3-5 days before or after shock treatments, but not in conjunction with.
